

Cairo-Dock 2.1.3 Is Out, Features A Simplified Configuration Panel

Contributed by LXer Linux News
Monday, 08 February 2010

After 3 months of hard work, the new version of GLX-Dock/Cairo-Dock (2.1.3) is out. The new version brings a lot of fixes for some existing problems such as smoother auto-hide, automatic detection of indirect rendering for Intel/ATI cards, but the most visible change in Cairo Dock v2.1.3 is the new configuration panel which is now very easy to use.

After 3 months of hard work, the new version of GLX-Dock/Cairo-Dock (2.1.3) is out.
