

## 10 Ways that Enterprises use Linux

Contributed by LXer Linux News  
Monday, 08 February 2010

Do you use Linux in your enterprise? These are the ten ways that I've seen it used. The world's largest technical support, software and hardware companies use Linux on a daily basis for a variety of tasks and solutions. This post gives you an overview of all the ways in which large companies use Linux. Most don't use Linux on the desktop but do use it in ways you might expect (and a few you might not expect) a company of that magnitude to use it. They've leveraged Linux for some of the most critical workloads and 100% uptime service levels. Welcome to the world of enterprise Linux.
