Here is another one! It is encouraging, yet not surprising to see how many Linux migrations are taking place recently. I do struggle to keep up with them all; try though I may, it is nearly impossible. This time, we have another coming from a South African bank. First National Bank of South Africa has announced a partnership with Novell to switch 12,000 desktops over to Linux.

Excerpt:

Following recent reports of a South African bank eyeing out Linux, Novell South Africa today issued a statement in which it said it had reached an agreement with First National Bank of South Africa to standardise the bank's 12 000 desktops in its 680 retail branches on Novell's Linux product.

With 12 000 desktops switching to Linux this is very likely the most significant Linux and open source implementation in South Africa to date.

Stafford Masie, managing director of Novell SA, said that Novell's ability to offer a complete ecosystem to take care of the customer long after the installation of software and establish a trusted relationship was key for FNB. Deployments like this one continue to demonstrate the value and readiness of desktop Linux solutions from Novell for enterprise customers.
